Lamia Kajal

Full Stack Developer

Dhaka, Bangladesh | lamiakajal@gmail.com | lamiakajal.com | github.com/lamiakajal | linkedin.com/in/lamiakajal

PROFESSIONAL SUMMARY

Full Stack Developer who builds fast, responsive and well-designed web applications with Next.js, TypeScript, React, Node.js and MongoDB. Completed Programming Hero's AI-Driven Full Stack Web Engineering course and has built and deployed multiple projects, including a full-stack price-tracking app with authentication and a personal portfolio with an admin blog. Cares about clean, readable code, polished animation and performance, and uses AI-assisted development to ship faster without lowering quality. Open to work and collaboration.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js (App Router), Tailwind CSS, responsive design, UI animation
Backend & Data	Node.js, API routes / REST, MongoDB (Atlas), Mongoose, authentication with BetterAuth (email, GitHub and Google login)
Tools & Workflow	Git, GitHub, Vercel deployment, VS Code, AI-assisted development

PROJECTS

Personal Portfolio & Blog — Live | GitHub

Next.js, TypeScript, Tailwind CSS v4, MongoDB, BetterAuth, Cloudinary, Resend

- Designed and built a multi-page, fully responsive portfolio with dark/light themes, scroll-triggered and looping animations, a case-study page for every project, and a working contact form.
- Added a full-stack blog: GitHub/Google/email login, admin-only post editor with image upload, safe Markdown rendering and social sharing.

BazarDor — Live | GitHub

Next.js, TypeScript, Tailwind CSS, BetterAuth, MongoDB Atlas

- Commodity price tracker for Dhaka markets with a Bengali-first interface (Bengali numerals and dates), price-change indicators and a live risers/fallers ticker.
- Protected product pages with middleware and email, Google and GitHub sign-in; sorting by parsed numeric price for accurate ordering.

FitLog: Workout Library & Daily Lift Tracker — Live | GitHub

Next.js, TypeScript, Tailwind CSS, React Context API, localStorage

- Fitness app with searchable exercise library, muscle-group filters, bookmarks and a daily plan capped at five workouts to prevent overtraining.
- Live totals for duration and calories, completion checklist and state that persists across sessions.

AXIT and Lucid: SaaS Landing Pages — AXIT | Lucid | GitHub

Next.js (App Router), React, Tailwind CSS, IntersectionObserver

- Two production-ready, fully responsive landing pages (mobile to ultra-wide) with navbar drawer, pricing, testimonials and contact sections.
- Scroll animations that replay in both directions built with native browser APIs and hardware-accelerated CSS, with no animation library.

DevStack — Live | GitHub

React, TypeScript, Vite, Tailwind CSS, React Toastify

- Interactive app to explore, compare and assemble a development stack from frontend, backend, database and tooling options.
- Live "Your Stack" sidebar with duplicate prevention, single and bulk removal, toast feedback and JSON-driven data.

EDUCATION

Bachelor of Business Administration (Honours), ongoing	Govt. Shaheed Suhrawardy College
Higher Secondary Certificate (HSC)	Rokeya Ahsan College
Secondary School Certificate (SSC)	Bamoil Ideal High School and College

TRAINING, CERTIFICATION & ACTIVITIES

AI-Driven Full Stack Web Engineering (completed)	Programming Hero
Full Stack & Web Development, Course 309 (certificate, 2025)	Codemanbd
Additional certificates: UI/UX Design, Graphic and UI Design, WordPress & eCommerce	Shikhbe Shobai, Codemanbd
Music & Fine Arts	Bulbul Academy of Fine Arts (BAFA)
